WHAT'S NEW AT PERRY'S PLANTS

In the rush of spring business, we here at Perry's Plants find it difficult to take time to really sit down and go over all the good literature, announcements, catalogs, etc., that come to us. Thinking that we're not alone in this situation we just want to tell you that you'll find on our New Spring Price List, enclosed, all the usual fine varieties of Flowering Bedding Plants, Ground Covers, Trees, Hedges and Vegetables that we've listed in previous years and also several NEW items that deserve to be brought to your attention. Not all these are new in the sense that they're new creations, but many are fine plants that have been overlooked, lost, forgotten or just never offered in this area before. As we all know, our competitors in other lines of business are constantly whetting the appetites of their customers with new models - new "this" and new "that" - it brings in customers and their dollars. We've got to keep pace to get our share in the Nursery Industry. Maybe some of the following will do just that for you.

FLOWERING ANNUALS & PERENNIALS

AMARANTHUS (Joseph's Coat) - Locally, at least, this fine annual has been badly neglected. With the current demand for bright foliage colors and textures, this splendid variety is receiving increasing recognition. Grows 3 to 5 feet tall, prefers a hot sunny location and not too much water. Foliage is a vivid red mottled with green and yellow. Can't be beat for a contrasting background plant.

DWARF MARIGOLDS - PETITE STRAIN - Dwarf Marigolds have long been some of our most popular summer flowering plants. With the introduction of the Petites this year we can offer plants that are lower and more compact than any previously available plus plants that start to bloom smaller and earlier and continue right on. They'll grow about 6 inches tall and 10 inches wide and they'll bloom so profusely as to nearly hide the foliage. Four good colors available, Petite Gold, Petite Yellow, Petite Orange, Petite Harmony (red & gold). Since they were selected as All American Winners for 1958, they'll receive much publicity and be in demand by your customers.

SWEET WILLIAM "WEE WILLIE" - A new annual Sweet William that starts blooming while still a little fellow and continues on for many weeks. Many folks have stopped growing Sweet William because they were not willing to give valuable space to a plant that had to be grown several months before starting to bloom. Wee Willie grows 6 inches tall and compact. Plant close together for best effect.

PETUNIA MAYTIME - A new F-1 hybrid and All American Winner for 1958. Large ruffled grandiflora type flowers a soft salmon pink. Plants are dense in habit and vigorous growers.

PETUNIA ALL DOUBLE - SEPARATE COLORS - Not new but offered again this year. Discriminating customers are more conscious of color effects and have been asking for Double Petunias in separate colors. We have available this year ALLEGRO (Salmon Pink), CAPRICE (Rose Pink), SONATA (White) RHAPSODY (Wine Purple).

STACHYS LANATA (Lambs Ears) - Another long forgotten plant that merits and will receive increasing use. Soft, wooly, white foliage, densely covers this hardy perennial. Grows to 18 inches in height and makes an excellent border. Here's a good substitute for those folks tired of Dusty Miller yet wanting something to give a similar effect. Also has attractive small purple flowers. Easy to grow and hardy.

PINK MARGUERITE - Marguerites have been popular for many years but always available in either white or yellow. This year a pink variety is offered. Foliage is dense and covers the plant well. Flowers are of good size and a light orchid pink color that is very pleasing. Fine for cutting.

EARLY FLOWERING CHRYSANTHEMUMS - This year for the first time we are offering an excellent selection of Early Flowering varieties. These will be particularly useful for those in areas subject to early frosts as they will generally be in bloom well ahead of killing frosts. For us, many start to bloom in late August and are a riot of color through September and into October.

GROUND COVER AND BORDER PLANTS

AEONIUM decorum - A dense bushy growing succulent plant that is very attractive for borders or for mass planting in beds. Foliage green edged with bronze. Dainty pink flowers on sprays 18 inches tall. Easy to grow in either sun or shade. Also makes an excellent potted plant.

ERODIUM chamaedryoides (rosea) - Hardy little perennial that grows about 3 inches tall and blooms over a long period through summer with small pink star shaped flowers. Excellent for borders or for mass planting in beds where it creates an interesting low mound effect. Attractive ever-green foliage.

SEDUMS - For the past several seasons more and more interest and use has been made of this versatile family of plants. Their ease of growth, hardiness and adaptability to the landscape scene are assets that cannot be overlooked. Some are very low creepers others of more gushy upright growth - all are colorful of foliage and many extremely showy in bloom. If not acquainted with this useful family, you are missing an acquaintance that can be both pleasurable and profitable. The two following varieties are being listed this year for the first time.

SEDUM ANGLICUM "Perry's Green". - This hardy variety spreads rapidly forming a low 3 inch bright green carpet that looks well the year around. Folks tell us it's hardy in Salt Lake City and we know it's hardy here, growing well in either full sun or light shade. Plant 8 to 10 inches apart for best coverage. Not particular about soil requirements.

SEDUM SPURIUM - For some time we've called this our "Rosette" Sedum. Each stem is topped with a little rosette of deep green leaves with bronze edges. It forms a very thick cover and grows rapidly in either sun or light shade. It has survived frosts down to 10 degrees with no ill effects and will probably tolerate even colder temperatures. Grows 3 to 4 inches high. Plant 8 to 10 inches apart.

OPHIOPOGON japonica "Mondo Grass" - We make mention here not because it is particularly new but simply to let you know that for the first time stocks are available in quantities to assure you an ample supply for all planting needs. Its ease of growth, good looking year around appearance and hardiness are bound to find favor with your customers. Reports coming in to us have been most gratifying. Even in the hottest desert regions, Mondo is surviving well where given some shade and ample water, whereas many other ground covers often completely die out in the summer heat.

VERONICA repens - Was used quite extensively several years ago during the rock garden fad and is now making a comeback as a useful ground cover. Spreads rapidly over the ground forming a dense carpet 3 to 6 inches tall of bright green foliage. In spring 3 inch spikes of bright blue flowers nearly hide the foliage. Likes plenty of sun and moderate watering. Plant 8 to 12 inches apart. Hardy.

VEGETABLES

HYBRID TOMATOES - F-1 Hybrid tomatoes are proving to be quite superior for home gardeners and commercial growers alike. Their more vigorous growth, both tops and roots, resistance to disease, abundance of fruit and superior quality are of proven merit. To satisfy those customers who want something just a little better, we are offering plants, grown in plant bands, of Burpee's Hybrid and Burpee's Big Boy. Burpee's Hybrid has been very reliable in coastal regions and Burpee's Big Boy is highly recommended for interior regions. Those who have tried them say the few pennies more for the original cost is multiplied many times over in the profits of abundant harvest.

SALES AIDS

We've long felt that you, our customers, need more and better helps in your sales of Bedding Plants and Ground Covers. While we've still a long way to go we have at least made a start. A DESCRIPTIVE GROUND COVER LIST, printed in color is available for you and your sales help. Let us know when you need more. The 1958 International Flower Show will again have an exhibit of Perry's Plants featuring and promoting the use of Ground Cover Plants. In addition numerous newspaper articles, well illustrated, are planned and underway.
